

# Creating Our Culture

## Service Users and Carers: Complete Our Culture Survey

Last year, we launched our new Trust strategy along with our five new ambitions. One of these ambitions is to 'build a culture of trust together'.

We know that more needs to be done to achieve this. In February 2022, we launched our Creating Our Culture programme and since then, we have spoken to hundreds of staff, service users and carers to gather important data about what makes a good day and a bad day in our care.

If you are a patient or a carer, we would like to hear from you. **Please fill in this short survey by scanning the QR code below.** Everything that you tell us will go into creating South London and Maudsley's first Values and Behaviours Framework.
